

Sarah Aninditya

Bogor City, West Java

✉ sarahaninditya@gmail.com  github.com/Kafka-Sr  [Website Portfolio](#)

Bachelor of Applied Science student in Computer Engineering at IPB University, with a strong interest in cybersecurity and software development. I'm a critical thinker who is proactive, collaborative, and comfortable working both independently or part of a diverse team.

EDUCATION

IPB University

Bachelor of Applied Science in Computer Engineering – GPA: 3.63/4.00

Aug 2023 – Jun 2027 (Expected)

Bogor, West Java

WORK EXPERIENCE

PT. Astra Komponen Indonesia (Astra Otoparts Group)

Jan 2026 – Jul 2026

Digitalisation Intern

Bogor, West Java

- Conducted authorised black-box penetration testing of two production websites, identifying 6 vulnerabilities across Critical and High severity levels, and delivered formal pentest and retest reports to management.
- Helped establish the division's IT security compliance foundation by authoring 9 ISO 27001:2022-aligned SOPs and mapping controls across ISO 27002, COBIT 2019, and ITIL 4 into audit-ready documentation and KPI frameworks.
- Developed a full-stack customer Claim and Service request system in Django and SQL Server, digitalising a previously paper-based workflow across 7 departments, with automated email notifications and role-based access control.
- Built a real-time Dandory mold changeover tracking module covering 50+ plastic injection machines, digitalising timestamped mold-up/mold-down checksheets for 600+ monthly changeover events and aggregating downtime data into a management reporting dashboard.

PROJECTS

Biligun Companion – IoT-Based Neonatal Bilirubin Monitoring Medical App

Jul 2026

IPB University | Flutter, Android Studio, IoT Integration

- Led the development of an offline-first Flutter/Dart Android medical app using Supabase (PostgreSQL) cloud and Drift/SQLite local DB with bidirectional sync, designing the full database schema to enable real-time neonatal bilirubin monitoring and risk assessment across multiple hospitals.
- Shipped 3-tier role-based access with biometric auth, BLE/Wi-Fi IoT device pairing with a Raspberry Pi sensor, inter-hospital transfer workflows, and a tamper-evident audit log with PDF export, localised in 2 languages (EN/ID).

Website Penetration Testing

Feb 2026

PT. Astra Komponen Indonesia | Kali Linux (VirtualBox), Burpsuite, OWASP ZAP

- Conducted end-to-end black-box penetration testing of two company-owned production websites, identifying 2 Critical and 4 High severity vulnerabilities including an internet-exposed EOL PostgreSQL instance and Cloudflare WAF bypass via origin IP disclosure.
- Authored formal penetration testing and retest reports, verified closure of all Critical findings in retest, and delivered actionable security hardening recommendations.

Customer Claim & Service Request System

May 2026

PT. Astra Komponen Indonesia | Django, Django Rest Framework, SQL Server

- Digitalised end-to-end customer Claim and Service request lifecycle across 7 departments, processing 20+ monthly requests and cutting multi-day paper-based approval cycles down to a fully tracked, auditable digital workflow.
- Engineered a 7-step sequential digital approval system with role-based access control via Django auth groups, reducing manual follow-up overhead by triggering automated email notifications to each approver at every sign-off stage.
- Designed and maintained a 10+ table relational SQL Server schema modelling approval flows, line items, and user mappings across the two parallel Claim and Service modules.

SPROUTIFY – Realtime IoT-Based Tomato Monitoring System

Jun 2025

IPB University | Laravel, Firebase, IoT Integration

- Led the development of a real-time IoT-based tomato monitoring system, focusing on system integration, secure data handling, and real-time sensor data visualisation.
- Managed the entire development lifecycle and coordinated with the hardware team to ensure reliable data transmission and system stability across the IoT infrastructure.

- Architected a full-stack multi-role Flask web application for monitoring chicken egg production integrated with an e-commerce system (Midtrans) to support end-to-end farm-to-buyer workflows.
- Integrated image-classification models to enable automated chicken egg quality assessment and real-time colour grading through API-driven processing.

ORGANISATIONAL EXPERIENCE

Micro IT Student AssociationOct 2023 – Nov 2025

- Steering Committee as the Second General Treasurer.
- First Treasurer of IT Knowledge 2024.
- Program Division Staff of the Micro IT 2024 Elections event.
- Software, Hardware, and Networking (SHN) Staff from the Micro IT Student Association 2023/2024.

ROHIS Religious Student AssociationDec 2024 – Nov 2025

- General Treasurer of the Islamic Program Department.
- Steering Committee of Tabligh Akbar 2025 (main event of the Islamic Program Department).
- Event Leader of Nongkrong Islami 3 (2025).

Teknik Komputer (TEKOM) 60 Organising CommitteeNov 2023 – Jan 2026

- Program Division Staff of Field Trip TEKOM 60.
- Program Division Staff of Gathering TEKOM 61.
- Program Division Staff of Siang Keakraban TEKOM 61.

TRAININGS & CERTIFICATIONS

- | | |
|--|-------------------------------------|
| • Cisco CCNA: Enterprise Networking, Security, and Automation | Cisco, Jun 2026 |
| • Cisco Network Technician Career Path: Networking Devices and Initial Configuration | Cisco, Aug 2025 |
| • Security Manpower Training (SMT) 2025 Cybersecurity Trainee | KISIA and NSHC Inc., Jul – Aug 2025 |
| • Building SOC Expertise: Cybersecurity Incident Response Fundamentals | IndoProtect, Oct – Dec 2024 |
| • Cisco CCNA: Switching, Routing, Wireless Essentials | Cisco, Dec 2024 |
| • Skills for All 2024 Cybersecurity and Networking Trainee | IPB University, Jul – Oct 2024 |
